Substance Misuse Treatment Services and Supports

DONEGAL 2009

A MESSAGE FROM THE CHAIRMAN

The prevalence of illicit drug use and underage drinking continues to increase nationally despite the efforts of all those involved in education and prevention, treatment and rehabilitation and supply reduction. Raising levels of awareness of illicit drug use and underage drinking, and educating individuals and communities about available supports and how to access them, continues to be the most appropriate response to these problems in the first instance.

This Directory of Services has been published by the North West Regional Drugs Task Force, a multi-agency body established under the National Drugs Strategy in 2004 to provide local responses to illicit drug use and underage drinking in the region. It is intended to be an information source for practitioners, for the wider public it lists the resources and supports available within the North West, giving projects and programmes currently being funded by the North West Regional Drugs Task Force and the relevant HSE provided services.

I would like to sincerely thank the members of the North West Regional Drugs Task Force, the promoters of the projects and programmes presented in this directory, and, especially, all those involved in the delivery of services and supports to those at risk. Only by committing ourselves to working together in resolving the problems of illicit drug use and underage drinking in the region, and by supporting those involved in delivering services, can we hope to reduce the impact of these problems.

Loman Conway

Chairman
